

Creeping Wire Vine

Muehlenbeckia axillaris

Height: 3 inches

Spread: 3 feet

Sunlight: ○ ●

Hardiness Zone: 5

Description:

An unusual creeper with a dense fine texture, producing a spreading mat of wiry stems clothed in tiny rounded leaves that are glossy green; flowers are not showy; great in the rock garden or as a small groundcover

Features & Attributes

Creeping Wire Vine's attractive tiny glossy round leaves remain green in color throughout the year on a plant with a spreading habit of growth.

This is a dense multi-stemmed evergreen houseplant with a spreading, ground-hugging habit of growth. Its extremely fine and delicate texture is quite ornamental and should be used to full effect. This plant can be pruned at any time to keep it looking its best.

Planting & Growing

When grown indoors, Creeping Wire Vine can be expected to grow to be only 3 inches tall at maturity, with a spread of 3 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
