

Toto® Lemon Coneflower

Rudbeckia hirta 'Toto Lemon'

Height: 10 inches

Spread: 12 inches

Spacing: 10 inches

Sunlight: ☉

Hardiness Zone: 4

Other Names: Gloriosa Daisy, Black Eyed Susan

Description:

This dwarf variety produces many large yellow daisies with chocolate brown eyes all summer, on short stems; makes an outstanding cut flower; deadhead for re-blooming; drought tolerant once established; wonderful along borders or in containers

Ornamental Features

Toto Lemon Coneflower has masses of beautiful lemon yellow daisy flowers with dark brown eyes at the ends of the stems from early summer to late fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its serrated pointy leaves remain green in color throughout the season.

Landscape Attributes

Toto Lemon Coneflower is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Toto Lemon Coneflower is recommended for the following landscape applications;

- Mass Planting
 - Border Edging
 - General Garden Use
 - Container Planting
-

Planting & Growing

Toto Lemon Coneflower will grow to be about 8 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 3 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This is a selection of a native North American species. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Toto Lemon Coneflower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
