Kiwi Dazzler Cabbage Palm

Cordyline australis 'Kiwi Dazzler'

Height: 15 feet

Spread: 5 feet

Sunlight: ○ ◐

Hardiness Zone: 8

Other Names: Cabbage Tree, Giant Dracaena

Description:

Stunning leaves in shades of pink and olive green with cream spines; spectacular when massed on the landscape; perfect for adding a lush, tropical look to the garden or containers

Features & Attributes

Kiwi Dazzler Cabbage Palm features showy panicles of fragrant white flowers in early summer. Its attractive sword-like leaves remain pink in color with pointy creamy white spines and tinges of olive green throughout the year.

This is an open multi-stemmed evergreen houseplant with an upright spreading habit of growth. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant should never be pruned unless absolutely necessary, as it tends not to take pruning well.

Planting & Growing

When grown indoors, Kiwi Dazzler Cabbage Palm can be expected to grow to be about 15 feet tall at maturity, with a spread of 5 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
