Needlepoint English Ivy

Hedera helix 'Needlepoint'

Height: 12 inches

Spread: 3 feet

Sunlight: ○ ◐ ●

Hardiness Zone: 5

Other Names: Common Ivy, European Ivy

Description:

This variety is a small evergreen climber or dense groundcover with elegant, dark green leaves that have 3 to 5 sharply pointed lobes; benefits from some protection from sun and wind in cold winters; perfect for containers, hanging baskets, or stone walls

Features & Attributes

Needlepoint English Ivy's attractive small glossy lobed leaves emerge chartreuse, turning dark green in color with distinctive light green veins throughout the year on a plant with a spreading habit of growth.

This is a multi-stemmed evergreen houseplant with a spreading, ground-hugging habit of growth. Its relatively fine texture sets it apart from other indoor plants with less refined foliage. This plant can be pruned at any time to keep it looking its best.

Planting & Growing

When grown indoors, Needlepoint English Ivy can be expected to grow to be about 12 inches tall at maturity, with a spread of 3 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil pH, but grows best in rich soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
